Professional Summary

Experienced IT professional with **2+ years of hands-on experience** in system administration, IT support, and front-end development using **React.js**. Skilled in troubleshooting hardware, software, and network issues, managing user accounts, performing backups, and supporting web-based academic systems. Proven ability to develop responsive front-end interfaces, prepare technical documentation, and deliver user training. Adaptable, detail-oriented, and committed to secure and efficient IT operations.

About Me

I am a proactive IT professional who enjoys analyzing technical problems, tracing them to their root cause, and implementing practical solutions. I take pride in building systems that run smoothly and providing end-users with reliable support.

With over 2 years of professional experience, I have successfully managed system administration tasks, supported web-based academic systems, developed responsive front-end interfaces using **React.js**, and delivered training and documentation to staff. I thrive in collaborative environments but am equally comfortable working independently, quickly adapting to new tools, coding standards, and workflows.

I am motivated to continuously improve my technical skills, maintain high-quality work standards, and contribute to effective IT and development solutions.

Professional Experience

Hawi Software Solution

System Administrator | IT Support | Front-End Developer (React) | Instructor Trainer
